

Option A | Decentralized production concepts

The future for chemical industry?

CHALLENGE OPTION A

DECENTRALIZED PRODUCTION CONCEPTS

THE FUTURE FOR CHEMICAL INDUSTRY?

Can decentralized production concepts be used for producing feedstocks for chemical industry?

Example for feedstock: Ethanol, renewable raw materials

CHALLENGE OPTION A

- Value chain and logistic concepts of dairy industry in Europe
- Characterize each player in the value chain
- Collect information about natural raw materials available in the value chain
- Collect information about chemicals needed in dairy industry incl. farmers
- Collect information about logistic concepts / analyze the structure of the logistic concepts
